

RM-10811

I do NOT support this petition. FISTS goal is to retain Element 1 at all costs. They are not looking at the good of Amateur radio; they are only looking at the good for themselves.

The only real change on this petition is raising the current code for Extra to 12 WPM. This has already been determined that 5 wpm was sufficient.

There is not any basis to this petition; it is simply a petition wanting changes without facts or reasons. They fail to give explanations as to why raising the code to 12 WPM would benefit Amateur radio. They also obviously are not aware that Tech Plus does not exist as a license class anymore and Tech and Tech plus are already one in the same.

I do NOT support this petition.
